

Organic silicone resin

S-570

Characteristics and Benefits:

1. S-570 is a network structure siloxane copolymer. This resin has strong adhesion and high hardness.
2. It is resistant to high temperature, aging and yellowing.
3. It has good hydrophobicity and is resistant to water washing.
4. The coating has good transparency and a long-lasting smooth effect.
5. It has excellent rheological properties.

Product specifications:

Appearance	A pale yellow transparent liquid
Component	Organic silicone resin
Non volatiles	50%

Application:

Surface water repellent treatment for paper, fabric, stone, plastic, metal products, etc.

Recommended dosage:

The recommended usage amount is 5.0 - 20.0% (please test the most appropriate dosage before use).

Usage :

Before construction, remove all dust and oil from the material surface. Then, dilute with organic solvents in a ratio of 5 to 20 times and apply by spraying, brushing, soaking, etc., using common construction methods. Please conduct a test before use.

Packing:

25kg/200kg blue barrel.

Storage:

Keep away from heat sources and light sources, and store in a dark place.
